

Factory Reset Instructions for SkyCentrics SkyPlug 100

1. Plug in the SkyPlug 100 so that it has power, and the Green LED on the button is ON.

2. Hold the button down for over 7 seconds until LED goes OFF, and then release.

3. The plug will reboot and power up and be factory reset and ready in about 10-20 seconds, at which time it will broadcast its "CB xxxxxx" Wi-Fi address and you can connect it to the Wi-Fi network of your choice.
